

HDPE flexible bends and uPVC long radius bends

There are two types of bends available for use with **Kabelflex** cable conduit, flexible HDPE bends and rigid long radius uPVC bends.

HDPE flexible bends

These bends are flexible and can be bent easily by hand to any angle or radius to suit one's requirements. They are supplied complete with one fitted push-fit coupling, and optional rubber sealing rings. A variety of colours are available to match the conduit.

Kabelflex conduit size
Nominal outside diameter mm
Overall length mm (<i>l</i>)
Bending radius mm (<i>r</i>)
Bend angle ° (α)
Belled ends
Push-fit coupling fitted
Rubber sealing rings
